A PDF is created with: Pdf pdf = new Pdf(); A PDF is written with: pdf.write(out); A page is created with: Page page1 = pdf.createPage(595, 842); A text with font times-roman is added with: page1.addText(20, 700, 12, "The text to display"); A text width can be calculated with: Font.TIMES_ROMAN.getWidth(FontsVariant.PLAIN, 12, "The text to search width for."); A text with another font is added with: page1.addText(20, 700, 12, Font.COURIER.getVariant(FontStyle.BOLD), "The text to display"); Below are texts with different fonts, colors, sizes and underlines: Times-Roman **Times-Roman Bold** Times-Roman Italic Times-Roman Bold Italic Courier Courier Bold Courier Italic Courier Bold Italic Helvetica **Helvetica Bold** Helvetica Italic Helvetica Bold Italic Σψμβολ ******□*******■*********▼**▲ An image is created with: $Image\ image = pdf.createImage(this.getClass().getResourceAsStream("/logo.png"));$ An image is sized and positioned with: image.setX(20); image.setY(70); image.setWidth(60); image.setHeight(30); An image is added with: page1.addImage(image);

When an image is used multiple times, no need to re-create its data.

Just save space in PDF by cloning it's references using:

Image image2 = image.cloneReference();

Change its size, position, etc and draw it again.

A straight line can be added with:

page2.addPath(new StraightPath(new Point(20, 640), new Point(150, 650)));

A line can be added with more points using:

StraightPath straightPath = new StraightPath(new Point(20, 510), new Point(20, 500), new Point(150, 500));

straightPath.setClosed(true);

page2.addPath(straightPath);

A Bezier line can be added with:

page2.addPath(new BezierPath(new Point(20, 440), new BezierPoint(50, 440, 30, 432, 40, 432))

Straight and Bezier lines can be filled/stroked/closed with:

 $Bezier Path \ bezier Path 2 = new \ Bezier Path (new \ Point (20, 400), new \ Bezier Point (50, 440, 30, 432, 40, 432));$

 $bezier Path 2. set Fill Color (new\ Color (80,\ 128,\ 128));$

bezierPath2.setFilled(true);

bezierPath2.setStrokeColor(new Color(128, 80, 128));

bezierPath2.setLineWidth(4.0f);

bezierPath2.setClosed(true);

page2.addPath(bezierPath2);
